Profile Summary: MBA candidate with **1.5+ years of experience in digital marketing and client acquisition** across financial services and agency environments. Skilled in **lead generation, consultative selling, CRM management, and digital campaign coordination** using outreach channels such as LinkedIn, email, and cold calling. Currently developing expertise in **Google Ads, marketing analytics, and performance marketing**.

Professional Experience

Marketing Specialist **08/2024 - 02/2025**
ANTRAJAAL, India

- Provided **L2 technical support for a Salesforce-based B2B telecommunications platform**, diagnosing production issues and ensuring platform stability.
- Managed and resolved **100+ incident tickets per week** using ServiceNow, investigating system errors and coordinating fixes.
- Used **SQL and Salesforce tools** to analyze data inconsistencies, migration issues, and system errors affecting enterprise users.
- Performed **data corrections and configuration fixes** to resolve platform issues impacting telecom service installations.
- Escalated complex issues to development teams via **Jira**, providing root-cause analysis and technical documentation.
- Served as a **direct technical contact for client support calls**, troubleshooting issues and coordinating with engineering teams.
- Collaborated with cross-functional teams including **telecommunications partners and infrastructure teams** to resolve installation-related incidents.

Sales & Marketing Executive **08/2023 - 08/2024**
SAKET FINCORP, Equity Brokerage Firm, India

- Developed frontend features for an **enterprise airline booking platform** used by airline agents, using **React, TypeScript, Redux, HTML, and CSS**.
- Implemented UI workflows for **ticket booking, passenger management, seat selection, and special service requests** including meals, wheelchairs, and unaccompanied minors.
- Built modules supporting **multiple payment options including cash, card, and airline loyalty miles**.
- Integrated frontend components with **REST APIs and backend services built with Java Spring Boot and PostgreSQL**.
- Contributed across the **full software development lifecycle**, including feature development, bug fixing, testing, and production support.
- Created and executed **manual test cases**, ensuring application functionality and reliability during sprint releases.
- Implemented **automation testing using Selenium** to support regression testing of React-based UI components.
- Participated in **client requirement discussions**, clarifying change requests and translating requirements into technical tasks.
- Collaborated closely with **backend developers and QA engineers** to debug issues and ensure smooth feature delivery.

Education

MBA, International Business, University of Europe for Applied Sciences, Berlin **Present**

Bachelor of Business Administration (BBA) in Business Analytics, Christ University **2023**
